

Sacramento Southern Railroad - MOW Update March 20, 2013

Hello All,

Sorry this is so late but too much going on. Tuesday night Richard ran the crew and worked in the shop removing the hydraulic tank on the shear.

Thursday we went into the erecting shop in search of ties. Found two bundles that we could get to. took them over to the shop and went through them. Ended up with just over a bundle.

Saturday we split into two groups changing ties and drilling ties for the turn table. this Saturday we will probably split into two groups and do the same things.

See you out on the line,
Alan, Richard and Chris
