

# MOW WEEKLY UPDATE!

4/26/2011

Hello MOW folks and welcome to the latest installment of the MOW Weekly Update. Like sands through the hour glass these are the updates of your MOW!

## WEEK IN REVIEW:

**Tuesday:** The crew met at the shop. Did good work and went home.

**Thursday:** More good work was done at the shop and by the good weed control crew afterward we went home.

**Saturday:** Chris let the crew for the day. They worked on switch #14 to get the points to throw a little easier. Heather and Richard worked on tightening bolts on the track #1 to the CPPS. Finally, we found that there are major problems with the hydraulic system of the tie shear, as the hydraulic pump seems to have broken apart and filled the system with shards of the pump. More repairs to come.

## WEEK AHEAD:

Frank, Chris, and Harry evaluate damage to the Tie Shear.

Chris, Frank, Mike and Heather work on the points of switch #14

**Tuesday:** We will be working in the shop starting at 5:00 p.m.

**Thursday:** We will be working in the shop starting at 5:00 p.m.

**Saturday:** We have more work on the track starting at 8:00 a.m.

See you out on the line,

John, Sandy, and Chris
