

MOW WEEKLY UPDATE!

4/26/2011

Harry and John watch as Chris works on Switch #9 in Old Sacramento.

Hello MOW Folks and welcome to the latest MOW Weekly Update. The crew has been busy this past week both in the shop and out on the line. The up coming week will be short with just Tuesday night work crew. Without further delay let's get to the updating.

WEEK IN REVIEW:

Tuesday: The crew worked in the shop, Pat and Gene worked on the manlift, Mike did some work, Ron was there as were Richard and Heather. Good work by all present.

Thursday: Ron, Richard, and Heather all worked in the shop on Thursday doing shoppo things.

Saturday: We started the day intending to change ties. But as with all good plans they were not to happen. The backhoe failed before work began, so half the crew worked on the replacing the broken light on the tamper while the other half limped the backhoe back to the shop. In the afternoon, the crew went out to the Old Sacramento yard and worked on repairing switches. A stop clip was replaced on switch #5 and replaced a connecting rod on switch #9.

WEEK AHEAD:

Tuesday: The shop crew will start at 5:00 p.m. under the direction of Chris.

Thursday: NO MOW

Saturday: NO MOW DUE TO THE HOLIDAY.

See you out on the line,

John, Sandy, and Chris

For those of you wishing to see more of the day go to:
