Date: February 21, 2013

Report No. Signal Shop 2013-06

---

## Daily Signal Shop Report for February 14, 2013

### Signal Shop Work Day 2013-05

Crew: Dan, Joe, Bob, Dennis, Gary, Carl, Karl, Michael, Dale, Joe1

Briefing by: Joe1 – Signal Shop Supervisor

Safety Rule For Today [actually 2 of them] 1.1.2 Alert and Attentive and 1.1.3 Accidents, Injuries, and Defects

The Signal Engineer, the Signal Shop Supervisor, and Signal Associate Dan were given a tour of and a briefing on work to be done by the shop on the recently acquired semaphores and associated equipment by Alan Hardy.[Director of Railroad Operations]

The following was accomplished

A spirited crew consisting of Gary, Dennis, Joe 3, and Michael joined forces today to build pallets, securely store Wabco #5 and proceed with the stripping of Wabco # 6..This involved a lot of shuffling of work benches, pallets, and acquired equipment.

Joe 3 was the designated forklift driver for most of the day.

Karl painted the Griswold gate mechanism while Bob and Dan “engineered” a fix for mounting the lights on the mast for the Griswold unit.

Railroad Foreman of Engines Red Hadler joined in the fun by steam cleaning the Wabco #6 case [for a price: Signal Fuel]

Carl took on the task of getting the bead blaster cleaned and operational for next week [we need media i.e. glass beads] He also turned in the receipts for parts required to restore the gongs

The Signal Engineer Dale was able to rustle up some time to discuss some shop administration “stuff with Carl and the shop safety program with Dennis and shop administration with Joe 3

A very productive and fun day for all

Respectively Submitted.

Joe1  
Signal Shop Supervisor
